1. The attached table lists the pharmaceutical and medical supplies to be pooled in the East German Operational Reserve (Operative Reserve). As previously reported 1/ a decision of the Council of Ministers stipulated that the State Reserve for pharmaceutical and medical supplies should in the future only include raw materials and basic products, whereas all other pharmaceutical and medical supplies were to be pooled into the Operational Reserve.
2. Only part of the supplies listed in the attached table, which constitute a total value of 15 million DM, have been prepared. The remainder are supposed to be made available in the near future. 2/

8. [Redacted] Comment: The totals listed in the attached table are not correct in every case. In some instances the total seems to be constituted by additions and subtractions, as for instance under "A", where the two last items seem to be added and their sum subtracted from the first item. The meaning of this could not be explained.
